PROJECTS DONE

- **Diabetic Retinopathy Classifier:** Built a deep learning system using CNNs (VGG19, CNN, ResNet50) to classify diabetic retinopathy from retinal images. Used Kaggle/APTOS datasets with advanced preprocessing and augmentation. Achieved up to 94.61% accuracy with ResNet50. Designed for clinical use to support early detection and reduce blindness risk
- **RR Fibres E-Commerce:** Developed a full-stack e-commerce website using React.js, Node.js, Express.js, and MongoDB, with real-time features via Socket.io. Integrated Stripe for secure payments. Includes product browsing, cart management, user auth, and order tracking. Built with a responsive design for seamless cross-device experience.
- **Personal Developer Portfolio:** Launched a responsive portfolio website to showcase my projects and skills. Built with TypeScript, Tailwind CSS, and Vite for fast, modern frontend development. Integrated EmailJS for a working contact form without backend. Hosted via Netlify with a custom domain from IONOS, and version-controlled on GitHub for seamless updates and collaboration.
